

## Ribo A

### Structure

### Key data

3' MW: 392.2 g/mol

### Properties

PCR primers containing a 3'-terminal ribose can be used to prevent cross-contamination of amplified sequences.<sup>i</sup>

<sup>i</sup> RY: Walder, JA. Walder "Use of PCR primers containing a 3'-terminal ribose residue to prevent cross-contamination of amplified sequences." Walder, R.Y. and Walder, J.A. Nucleic Acids Res. 1993 (21)4339-43.
